

Billing Department Information

Billing Process Overview

- Charges accumulate automatically in the patient's account as services, medications, and procedures are provided.
- The billing office verifies insurance coverage or payment arrangements at admission and again at discharge.

Payment Methods

- Accepted payment methods include cash, debit/credit card, bank transfer, and approved insurance panels.
- Patients with panel insurance must present a valid insurance card; the billing office coordinates pre-authorization where required.

Discharge Billing

- A final itemized bill is prepared once the discharging physician signs the discharge order.
- Patients or their families may request an itemized breakdown of all charges before making final payment.

Billing Disputes

- Any disputed charge is reviewed by the billing office within 5 working days, with the patient notified of the outcome in writing.
